

# Case Study

# Lycopodium Limited

# Mobility

The need for remote access via fast and secure business applications challenged Lycopodium Limited's (Lycopodium) existing IT infrastructure. The company needed to make critical changes that would result in improved mobility, access and support of their numerous sites across the globe.

### About Lycopodium

Through its subsidiaries, Lycopodium Engineering, Pdf and OMC, and its associate SUPL, Lycopodium provides a complete service to the mining and process industries from feasibility studies through design, procurement, project and construction management and commissioning. Projects are undertaken in diverse regions of the world.

With approximately 500 staff across offices in Perth, Brisbane, Melbourne, Sydney and Gladstone within Australia and in Accra, Ghana and Manila in the Philippines, Lycopodium is headquartered in Australia but has a global reach. ([www.lycopodium.com.au](http://www.lycopodium.com.au))

### The Challenge

As is the case with many successful businesses, Lycopodium was challenged with providing fast and secure access to business applications across their distributed network over vast distances.

Lycopodium required a solution that would not only cater for their existing needs but one that would also give them the ability to take advantage of future growth opportunities.

### The Solution

The L7 Innovations and Solutions team proposed a Citrix solution which allowed Lycopodium to grant access to their data and applications in real time anywhere in the world.

Through the use of Citrix Secure Gateway, users are now able to connect to the corporate network securely without compromising the quality of their performance.

### The Benefit of Engaging L7 Solutions

Through L7's engagement the right design and solution for Lycopodium's environment were implemented, resulting in an overall improved network.

The benefits have been:

- Improved performance of mission-critical database applications
- Secure access to a multitude of applications
- New site deployment without the need for large amounts of additional infrastructure
- Lycopodium staff now has a mobile and flexible work life with remote access to the company's network from home or on the road.

### Lycopodium

*"The L7 solution has been ideal for our purposes. L7 consultants were quick to assess our needs and came up with the right plan and implementation which has simplified everyone's life at Lycopodium while adding valuable flexibility within our environment".*

Andrew MacBeth – CIO.
