

L7 Solutions—Media Release

L7 Fortifies Its SharePoint Services Offering

PERTH, WA, 10 Sept—L7 Solutions announced today that it has augmented its SharePoint Services, part of its Advisory Services business unit, with two new offerings: SharePoint Implementation Assessment and SharePoint Development Services. The offerings aim to, respectively, guide clients in the use and development of the Microsoft application and provide them with L7 experts, should they need greater or semi-permanent support.

“The addition of SharePoint to the L7 Solutions offering is not a new one,” said Steve North, General Manager of L7’s Advisory Services, “but the addition of many new skilled developers and our Practice Lead, Tommy Segoro, *is.*” L7’s business advisors have been consulting with clients and making recommendations in regards to SharePoint for over a year and a half.

North went on to say that the new services were created to capitalise on the huge SharePoint demand in the marketplace. “A great many organisations in Perth are implementing SharePoint, and the L7 practice will make sure that they get the most out of the application and reap the business benefits of a planned implementation.”

As the SharePoint practice is part of Advisory Services, its developers and the application itself are deployed within a commercial context with an eye trained on the business processes being enhanced by SharePoint.

“L7 Solutions sees the SharePoint practice as an integral part of the organisation and foresees rapid growth within the team,” North said. “SharePoint is not just a buzzword and is more than capable of living up to its reputation, provided it is integrated with a disciplined approach that keeps the organisation’s business goals in mind.”

SharePoint, a product from Microsoft, offers a browser-based collaboration and document-management platform. It can be used to host websites that access shared workspaces and documents, as well as specialized applications like wikis and blogs from a browser.

L7 is a Microsoft Gold Certified Partner.
